Socks

We are providing services in Socks to Leading Brands, Stores, Importers, Distributors, and Retailers with exciting products ranges and excellent sourcing services.

Pricing :

Pricing is the most important part b/w customer and vendor. As per current global market competition customers try to make good quality product in low pricing. Hence in this situation, we try to meet customer target price as per requirement and market competition.

Quality Assurance

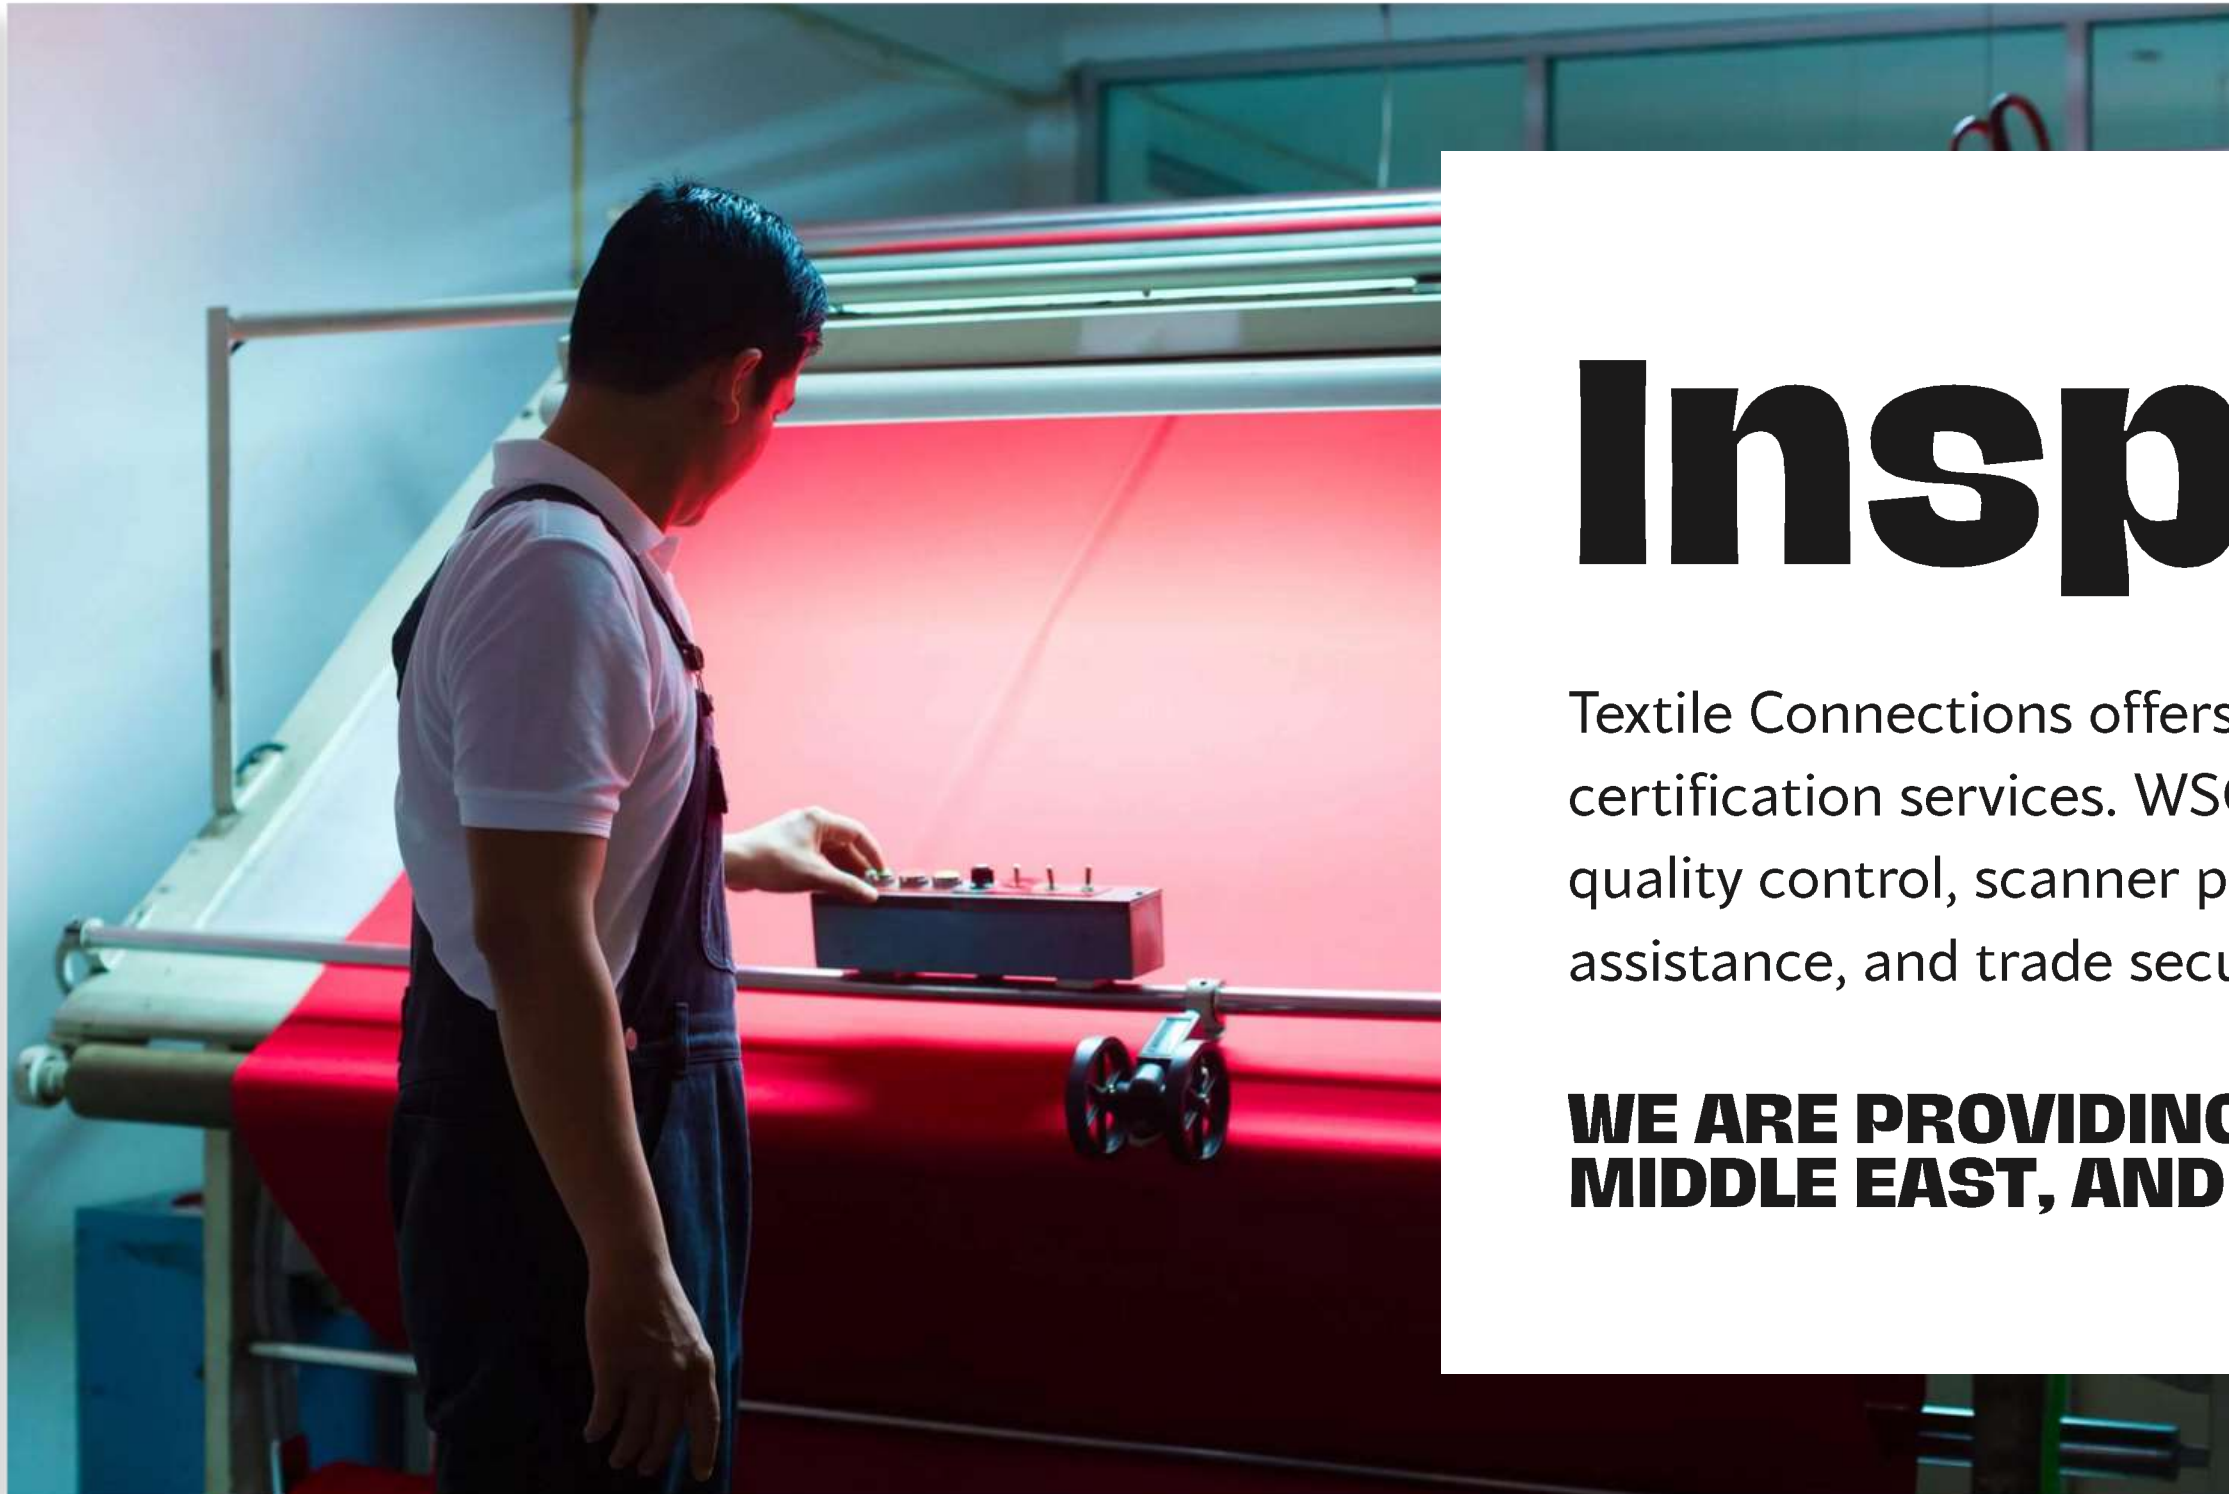

We consider our selves very conservative when it comes to quality standards in today's world success is behind quality which we take very seriously. Our quality checks are being conducted throughout the production cycle. From grey fabric checking till the final reconciliation of packaging.

Quality department starts its working in following ways:

- ✦ All in-house testing as per required parameters.
- ✦ Regular inline Inspection and send report to customer.
- ✦ Report sent for customer approval before finalization. .

QUALITY ASSURANCE

Inspection.

Textile Connections offers trade facilitation, security, and quality certification services. WSG excels in risk management, inspections, quality control, scanner projects, customs programs, valuation assistance, and trade security solutions.

WE ARE PROVIDING OUR SERVICES IN ASIA, EUROPE, MIDDLE EAST, AND THE AMERICA.

What kind of inspection is best for your product?

Following are the processes that improves your control over production and allows for timely correction of defects and improvements to quality.

Initial Production Inspection IPI.

Initial Production Inspection (IPI) is conducted before production begins. It identifies defects, minimizes non-conformities, ensures vendor understanding, and addresses deviations from specifications early.

Advantages:

- ◆ Ensure your requirements are met
- ◆ Preview the production process
- ◆ Avoid wasting time.

During Production Inspection DPI.

During Production Inspection (DPI) checks goods during production (40-20% completion). It improves control, corrects defects, and enhances quality.

Advantages:

- ✦ Verify your order is on schedule
- ✦ Make adjustments early in the production cycle.
- ✦ Ensure Golden Sample compliance for your products.

Final Random Inspection FRI.

Final Random Inspection (FRI) checks finished products (80% completion) for compliance with specifications and purchase order terms.

Advantages:

- ✦ Verify your goods before they are shipped.
- ✦ Approve final payment in confidence.
- ✦ Refuse the order if it does not meet your requirements.

Container Loading Supervision CLS.

Container Loading Supervision (CLS) ensures complete, secure loading of goods into containers. It verifies compliance with quantity, assortment, packaging requirements, and checks container condition.

Advantages:

- ◆ Ensure that your whole production is shipped
- ◆ Get your goods loaded with care.
- ◆ Check the condition of your containers
- ◆ Verify the correct quantity has been loaded

SHIPPING & LOGISTICS

CLS ensures complete, secure loading of goods into containers. It verifies compliance with quantity, assortment, packaging. Also checks export carton security and container condition.

Shipping & Logistics.

THE SERVICES OFFERED :

- LCL services to an impressive 1650 destinations.
- Weekly scheduled arrivals and departures using reputed carriers.
- Logistics & distribution services Full Clearing and Forwarding services.
- Hassle free service for all types of customs documentation and delivery

YOUR BENEFITS :

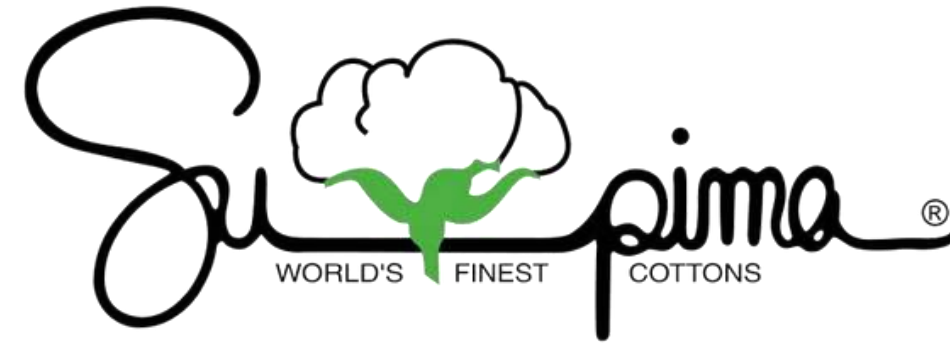

- Our existing distribution network allows us to roll out any product within 30 days.
- You receive a comprehensive and complete scope of services and infrastructure, which gives you a real.
- Competitive advantage.

ADVANTAGES :

- Ensure that your whole production is shipped.
- Get your goods loaded with care.
- Check the condition of your containers.
- Verify the correct quantity has been loaded.
